

Name: _____

MY 5 SENSES

The body has 5 senses. They are sight, hearing, smell, taste and touch. These 5 senses send information back to the brain. The brain does its job and tells you what you are seeing, hearing, smelling, tasting and touching.

Write your 5 senses.

1. My sense of seeing comes from my _____
2. My sense of hearing comes from my _____
3. My sense of smelling comes from my _____
4. My sense of tasting comes from my _____
5. My sense of touching comes from my _____

On a separate piece of paper draw the body parts that give you the 5 senses.

Write underneath what senses they are.

Find a book in the library about your 5 senses and read it.
