

Name: _____

FROGS

1)

Frogs lay their eggs in water. The eggs are called 'frog spawn'

2)

Frog eggs hatch into tadpoles.

3)

The tadpoles eat small insects and plant matter and breathe through gills.

4)

Tadpoles grow back legs first.

5)

At ten weeks old, tadpoles grow forelegs and their tails get shorter.

6)

At three months old they look like tiny frogs.

7)

A frog is called an amphibian because they can live in water and on land. Frogs eat insects. Some frogs are poisonous.

**Write a story
about a frog and
find pictures to
glue to your work.**
