

Teacher's Note

- Suggested 3 technology items: television, toaster, telephone.
- There are 3 technology items pictured.
- Help students to build a technology item or encourage them to draw something.
- Visit one of the web sites listed below.

Suggested Activities:

- ❖ Students could build something as a class project from recycled wires, old parts from radios, bikes, skateboards etc. Make a robot!
- ❖ Have students imagine living in a world without technology. How would they obtain flour to bake bread? How would they bake bread? How would they make clothes and basic things they use each day?
- ❖ Locate a book about the industrial revolution. Technology as we know it today didn't exist 100 years ago.
- ❖ Have students list games that don't use technology. How many can they think of?
