

Name: _____

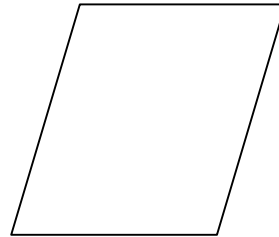

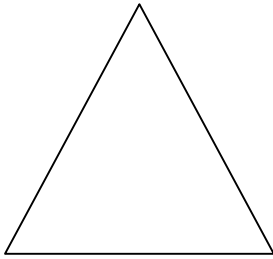

PERSPECTIVE

Perspective means that objects in the distance seem smaller than those close up. The further away something is, the less detail you can see.

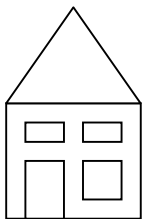

Perspective gives drawings depth. Look at the shapes below and colour the ones drawn with perspective.

Can you give the shapes below perspective?

Drawing a house is easy but can you draw one with perspective? Have a try!

Try drawing a row of houses using perspective. Have a look at a picture showing a row of houses or take a look outside. Count the houses you see and try drawing them on another piece of paper.
