

My name is: _____

Flies carry germs!

Don't let flies sit on your food, they carry germs. Germs can make you sick. You can't see germs with the naked eye, you need a microscope to see them. Always wash your hands before you eat. Keep your fingernails clean too! Germs like to live under dirty fingernails.

Your tasks:

- Place your hand on a piece of paper and trace around it.
- Draw a fly on each finger.
- Use a microscope to view germs.
