

Teacher's Note

- Students task is to write sums using the symbols given, then hand their finished worksheet to another student who is to complete the sums.
- Check if students have completed all the sums on a separate piece of paper as well with the correct answers and that they are workable before another student tries to calculate them.

Suggested Activities:

- ❖ Try the same activity again using different symbols students have learned or introduce new symbols.
- ❖ For on-line mathematics visit: http://www.teachingtreasures.com.au/maths/Maths_more.html
