

Name: _____

MONSTER MATH

Adam went for a walk one day and saw a big monster. Well, it was only a big worm but Adam always told tall tales. When he came home he told his Mum what he had seen. "It had 30 legs which were all sorts of colours. It had heaps of eyes and they were huge and bright yellow. It had at least 50 black spikes on its back which were really sharp and two large red fangs came out of its mouth."

Can you draw the monster Adam saw?
