

Name _____

Guam

The stunning, tropical island of Guam lies in the Pacific Ocean about two thirds of the way between Honolulu and Manila. Due to its strategic position, Guam serves as an air and naval base for the US. History tells that the Portuguese navigator Ferdinand Magellan landed on one of the Marianas, presumably Guam, in 1521. Beautiful coral reefs surround the coastal areas of Guam.

Draw the flag of Guam in the box.

--

How many years ago did the Portuguese navigator Ferdinand Magellan land in Guam?

What types of food could you grow on a tropical island such as Guam?
