

Name: _____

Look around you

Have you ever gone outside and taken a good look around? What did you notice? Did you see the frog eat the spider? Did you see the bird gobble up the worm? Did you see the butcher cutting up lamb chops? Living creatures depend upon other living creatures for survival.

Your Task:

Go outside and find a comfortable spot to sit. Observe your surroundings. Do you see a beetle or an ant? Watch it closely, follow it with your eyes. Watch a bird in a tree. What does it do?

Write one of your observations below. If you want to write more observations down use another piece of paper. Draw a picture of what you saw on the back of your worksheet.
