

Teacher's Note

- Help students locate a Ferris Wheel using a multimedia encyclopedia or the Internet. If no success try a book.

Suggested Activities:

- ❖ Make one Ferris wheel as a class project. Use an old bicycle rim as the wheel. Students can make little cardboard cars to hang from the wheel. Use wire to dangle the cars so the wheel moves around smoothly.
- ❖ Find out why it is called the Ferris wheel. (named after an American engineer G.W.G. Ferris 1859-96)
