

Name: _____

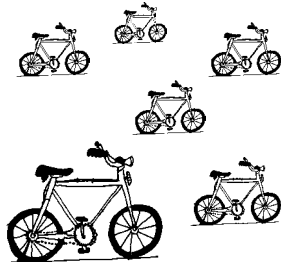

The Bicycle

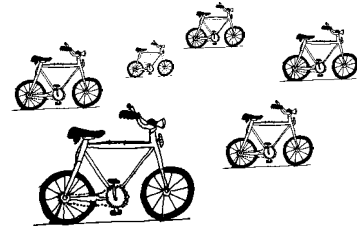

Bikes were invented in the late 1700s. They have changed shape very much.

There was a bike called the penny-farthing. It had a huge front wheel and a tiny back wheel.

Find a picture in a book of a 'penny-farthing'

Draw a penny-farthing.

How many bikes can you count on this sheet?

Count the bikes at school.

Who gives power, or energy to move the bike?

Would a bike work without a chain?

Draw a push bike chain.

The bike is one form of transportation. Write two more forms of transportation in this box.
