Someone crashed his car and caused much damage. It cost him \$1,854 for panel beating, \$1,990 to fix the front suspension, \$305 for a new radiator and hoses. He also paid \$786.45 for sundries with a total labour cost of \$2,089. How much was the total repair bill?

To get his car fixed more quickly the garage would add 15% on top of the total bill. The man decided to go ahead with this deal. How much is the total bill?

On top of the bill is 10% GST, how much is the total bill?

If seventeen thousand cars crash into trees each year Australia wide and $\frac{1}{4}$ of the trees die due to damage, how many trees would die each year?

It cost \$0.80 to buy a new tree and \$14.35 to plant it using a contractor. How much does it cost in total to replant all the trees that died in one year?
