

Teacher's Note

Answers:

- 1) 5 hours
- 2) $2\frac{5}{6}$
- 3) $\frac{11}{15}$ of her pocket money
- 4) $3\frac{1}{2}$ boxes left
- 5) 20 grams
- 6) 27 boys
- 7) 36 yellow car
- 8) 150 houses

Suggested Activities:

- ❖ Do some practical exercises with the class. Split them into 3 or more groups and ask questions about what fractional part has been removed to one side or what fractional part is male or female.
- ❖ Count chairs and ask the students to remove $\frac{1}{3}$ of the chairs.
- ❖ Have the whole class raise their hands and ask them to lower $\frac{1}{4}$. They will have fun working this one out among themselves. You can do many such practical and fun exercises without too much trouble.
