

Teacher's Note

Plants

Without the sun there would be no light and heat.
Plants could not exist without the sun.

Living creatures

All living creatures need the sun's light, warmth and energy to live and grow.
Without the sun there would be no plants to sustain the living creatures.

People

Without the sun there would be no light and nothing would grow.
Other living creatures would die too. People could not exist without the sun.

Suggested Activities:

- ❖ Obtain a book from the library that deals with the subject 'The importance of the Sun' and incorporate some of the book's contents with this worksheet.
- ❖ Have a discussion with the students about their thoughts of the importance of the sun.
- ❖ Visit: <http://seds.lpl.arizona.edu/billa/tnp/>
