

Teacher's Note

Answers:

Plants

Without water plants could not exist.

Living creatures

All living creatures need water to live and grow.

Without water there would be no plants to sustain the living creatures.

People

People could not exist without water. Other living creatures and plants would die too.

Suggested Activities:

- ❖ Discuss the importance of clean water. Do students know where water comes from? How is it treated in cities? How do people in rural areas catch and store their own water?
