

Name: _____

There are days when the sun shines from a cloudless sky, days where clouds gather and drizzle makes everything look grey. Other days are so cold you can't even play outside.

Did you know that the weather affects your mood? You might notice you feel so much happier when the sun comes out after a few days of rain and cold.

Weather determines how you dress. You probably would not wear shorts and a t-shirt on a cold, rainy day and you would probably not wear long pants and a jumper on a warm day.

Lots of people are always keen to know what the weather will be like. Airport control officers need to know the weather conditions so they can advise pilots. A concrete contractor needs to know if it's going to rain or if it's going to be a scorching hot day. He needs to know this so he can decide which mix of cement will be the best for the job.

Make a list of people who need to know the weather conditions and explain why.

e.g

Airport controller – advise pilots

Concrete contractor – which type of cement mix will be needed.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____

Can you explain what weather is. _____
