

Name _____

Ferns

Most ferns are leafy plants that grow in moist areas under a forest canopy, they don't like the full sunlight. They are vascular plants and reproduce from spores.

Vascular plants are those that have specialised cells for conducting water and sap.

In the box below, draw a picture of a fern. You can either find a picture from a book or find a fern from a garden.

Find the following words in a dictionary and write the meaning.

Reproduce

Spores

Cells

Sap
