

Indigo

Indigo is blue. It used to be derived from several plants but now it is made artificially from a compound of carbon, hydrogen, oxygen and nitrogen.

What items can you see where the colour indigo has been used?

--

Use a dictionary to locate the meaning of the following words.

Indigoid	
Indigo snake	
Indigo bunting bird	
Indigotin	

Research the history of indigo on the Internet. Write a report of your findings or give an oral report.
