

Name: _____

SEASONS
AUSTRALIA
HOLLAND

How many seasons are there in one year in Australia? Does Australia have the same seasons as Holland and do they occur at the same time? Is it winter in Holland the same time as in Australia?

Find the answers to the above questions then make an eight-page book. On one side of the page describe the Australian season in one local area. On the other side of the page describe the same season, as it would be in Holland. Keep the following points in mind as you make your seasons book.

- What is the weather like?
- What kind of temperatures could you expect?
- What clothes would you wear?
- What kind of outdoor or indoor activities would you do?
- What would some animals be doing?
- What would trees or plants be doing?

Leave enough room on each page for pictures. Collect these from suitable, old magazines and glue them in your book. Make sure the pictures suit the mood of the season.

e.g.

Australia WINTER	Holland WINTER
----------------------------	--------------------------
