

Name _____

Waste

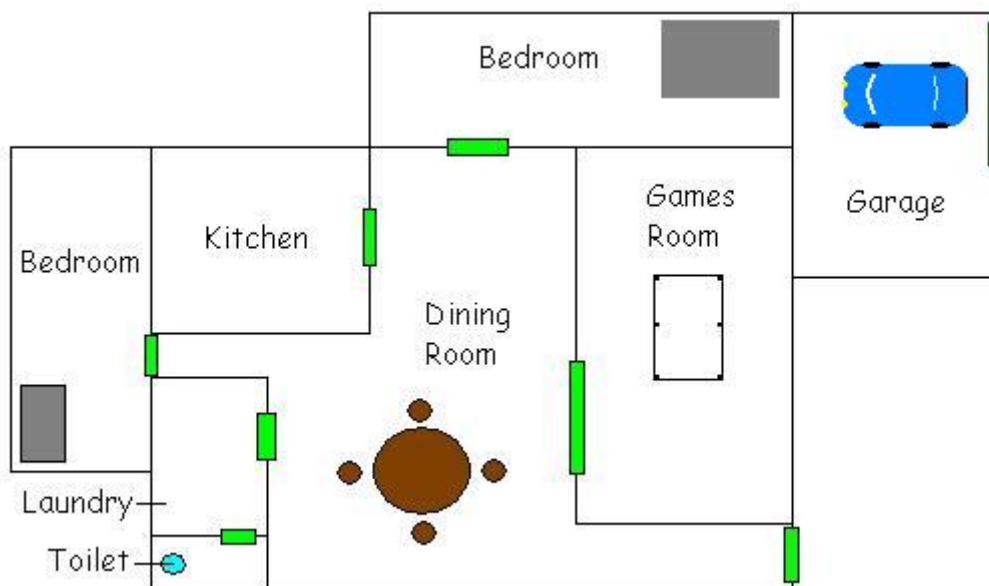

Much waste is produced everyday from just one household. Most of the waste humans produce gets taken to a landfill site for disposal. We can all help in reducing the amount of waste in several ways such as composting food scraps or re-using jars.

Discuss how waste affects the environment?

Your Task:

Write down the waste that comes out of the different areas from a household.

Bedroom:

Kitchen:

Games room:

Laundry:

Toilet:
