

Teacher's Note

- Check student's work for grammar, accuracy, creativity, colour and originality.
- Help students locate appropriate resource materials at a library.
- Obtain newspapers, t.v. magazines or computer magazines which contain pictures for cutting and gluing for students who are unable to obtain these themselves.
- Encourage students to read the newspapers or magazines in order to achieve a better understanding of computers and related items.

Suggested Activities:

- ❖ Computers are used so widely now that every student needs to be computer literate. If your students are not too familiar with the use of computers encourage them to use one at school, public library or friends place if they don't have one at home.
